Correction: Infestation of pine (*Pinus sylvestris* L.) seedlings with the pinewood nematode *Bursaphelenchus xylophilus* Steiner and Buhrer (Nickle) through wood sawdust

Elena N. Arbuzova1, Oleg A. Kulinich1,2*, Andrey A. Chalkin1, Natalia I. Kozyreva1, Vyacheslav V. Gorbach3 and Alexander Yu. Ryss4

Following publication of the original article (Arbuzova et al. 2023), the authors identified an error in the third paragraph of the Introduction section of their article.

**Incorrect paragraph:**
In 2008, outbreaks of PWN were detected in Spain, where it was probably introduced by Monochamus spp. vectors (EPPO 2010). The PWN outbreak in Spain has been eradicated (Zamora et al., 2015), but nematodes are intercepted annually by the National Plant Protection Organizations (NPPOs) in Europe and elsewhere in the world during consignment inspections.

**Correct paragraph:**
In 2008, outbreaks of PWN were detected in Spain, where it was probably introduced by Monochamus spp. vectors (EPPO, 2010; Zamora et al., 2015). The PWN outbreak in Spain is under eradication, but nematodes are intercepted annually by the National Plant Protection Organizations (NPPOs) in Europe and elsewhere in the world during consignment inspections.

The original article (Arbuzova et al. 2023) has been corrected.
